

OMNIBUS X Simplification for whom?

EU food & feed regulation
is entering a new
political phase

Pavel Glukhov

The debate is no longer **about simplification** itself

But about:

- who benefits
- who adapts
- who bears the risk

Several tensions now collide

- Competitiveness **vs** safeguards
- Europe **vs** global asymmetries
- Diverging interests **within** industry itself

There is no longer a single “industry position”

Regulatory design now shapes:

- industrial positioning
- market access
- geopolitical balance

Europe needs **workable** regulatory pathways

Balancing:

- protection
- competitiveness
- innovation capacity
